# About Company

MakservAfrica was established in the year 2014 and formerly registered in the year 2015 with the intention to develop innovative solutions through business integration and strategic partnership formulation. Our drive and commitment makes us stand out from our competitors while providing fair ground for us to provide quality and reliable services to our clients.

Makserv Africa professes good management, leadership, efficiency and the use of appropriate and cutting-edge technology to yield the most effective results.

## OUR MISSION

Our mission is to be your reliable, brisk, quality orientated service provider.

## OUR VISION

Our vision is to be the best in all opportunities awarded to us.

## CORE VALUES

- Honesty
- Accountability
- Respect
- Ingenuity
- Simplicity

Having these core values has made it easier for the company to make decisions whilst fostering team work that has in many instances made provision for us to be a productive company

A large orange Doosan excavator is the central focus of the image, positioned in a construction yard. The excavator's arm is extended upwards, and the brand name "DOOSAN" is visible on its side. The background shows a clear blue sky and other pieces of construction equipment in the distance. The entire image is framed by a thick orange border. A dark, rounded rectangular overlay is placed over the middle of the excavator, containing the main text. Two white horizontal lines are positioned above and below the text within this overlay.

**Our drive and commitment makes us stand out from our competitors while providing fair ground for us to provide quality and reliable services to our clients.**
